## Fellowship Group Questions

This week we have just 3 questions so spend a little more time in discussion with one another, seeking to pour over the text together, encouraging one another to raise questions, respond in worship and stop regularly to pray together or for one another.

- In light of what we read in John 11v1-16, how should our faith in Jesus shape our response to sickness, the death of a loved one and other challenges? What often dictates our response?
- When you read these verses, what is your response to the way Jesus treats the 'Lazarus household' and his disciples?
- Do we really believe that there is someone greater in life than death itself and the power of grief and sorrow? How might this change our outlook on life?
